

Are you Thinking of Becoming an Adoptive Parent?

TEEN IN NEED OF PERMANENT HOME

16 year old Liberian young man is looking for a permanent family to grow up in.

This teen is a smart, resilient, goal-orientated, funny, easy going young man who enjoys playing soccer, basketball and riding his BMX bike. He hopes to own his own soccer team in the future. He will be in the eleventh grade and has an Individualized Education Plan for additional support within the classroom. He is described as a bright student with great potential. He is meeting with success in his current foster home and has a part-time job at the local grocery store.

This teen would do best in a family with a strong male parent. He would like a family in which he will have siblings. Despite his age, this teen will need to develop a long-term relationship with adults that can help him navigate into independence and provide nurturance and support to him now and in the future. The family will also need to advocate for his educational needs and seek additional services both in the community and therapeutically in the future as needed.
